

The Solution: **Single Source Support** **For Your Networked Office**

s4 solutions will take responsibility for all your computer needs. Whether software, network or consulting services, we will be your single source of contact.

Our support program includes:

- Complete systems audit and assessment
- Consultation of technology issues
- Coordination with existing in-house staff
- Network integration and support
- Training in daily computer operations
- Helpdesk
- Upgrade of software as necessary
- 1-hour call back
- Priority on-site service
- Monitor systems thru-put and efficiency

We understand what it takes to run a viable user-friendly computer operation. We invest the time required to assess your needs, research solutions and work with your staff to develop cost effective solutions according to your exact business rules and processes.

s4 solutions, inc. was founded in 1992 to meet the needs of a rapidly changing demand for business technology and professional computer services. Our mission, overall, is to protect your information technology investment and improve your flow of information while developing scalable, cost effective solutions.

We have strong, diversified industry experience and a fully qualified technical staff to provide the following:

Computer networks. We design, install and support all Windows and Macintosh desktops and networks, including e-mail, firewalls, remote access, internet, intranet and application servers.

Software applications. We provide customized software to replace or augment your current applications; or, we can modify or upgrade your existing software in order to better manage and streamline your company's workflow.

Consulting. Our technical and consulting staffs include: Microsoft, Cisco and Citrix certified network engineers, A+ certified network technicians, certified cable installers, senior programmers, web developers, system analysts, Visual Basic, Access and Pick/D3 database specialists.
